Haptophyte Facts for Kids

Classification and places them in five orders; make up the Isochrysidales and Coccolithales.

Haptophyte

Ignorance of the role of alkenones in the cells of haptophyte algae, and of genetic versus environmental controls on alkenone parameters, means that genetic effects in both space and time remain important unknowns in alkenone paleotemperature research.

Pleurochrysis (haptophyte)

Compared to the lowest sulfate concentration, r and maximum density at a nominal sulfate concentration of 1000 mg l⁻¹ were 1. Yves Desdevises, in, 2012 2.

Haptophyte Algae

Temperature and photoperiod were set at 22°C and 12: 12 h light: dark, and light intensity was ~6500 lux. Blooms of this species in association with high sulfate levels also have been recorded in a few other instances; e. Linear regressions are shown for the differing A k C cat—K C and B k O cat—K O relationships displayed for Form 1B and 1D Rubiscos.
