mix new â€” Mix v1.12.2

Thank you both for the quick help! Display keyboard shortcuts Toggle night mode Go to a HexDocs package Disable tooltips Enable tooltips. A -module option can be given in order to name the modules in the generated code skeleton.

`mix phoenix.new` broken? · Issue #2297 · phoenixframework/phoenix · GitHub

After first trying to compile Phoenix from source which seemed to get me everything but the phoenix. The application name and module name will be retrieved from the path, unless --module or --app is given.

mix new â€” Mix v1.12.2

If you could try things out again on the default arch packages it would be really helpful to verify the fix. . A --sup option can be given to generate an OTP application skeleton including a supervision tree.

mix new â€” Mix v1.12.2

An --umbrella option can be given to generate an umbrella project.
