This is the type of fuse I use the most in my classroom. In painting this door I became obsessed with painting Koi ponds and have created a number of pieces in glass with this same theme.

### How to Fuse Glass in Your Ceramics Kiln

Keep an eye out for the next article in the series about teaching your students how to create using glass! You can have it go slow, like 100 degrees per hour, or much, much faster. Be sure to place each piece a few inches away from other glass pieces and the edge of the kiln shelf to prevent them flowing together or right over the edge! We all have egos which bruise easily. I once actually unloaded 550 unfused glass pieces because I chickened out.
