

# Health promotion for older persons - group program models

## National Council on the Aging - Health promotion

Description: -

-

Physics

Pharmaceutical arithmetic -- Programmed instruction

Pharmacy -- Tables

Pharmacy -- Problems, exercises, etc

City planning -- Mathematical models

Community power -- Mathematical models

Cognition -- Bibliography

Learning, Psychology of -- Bibliography

Nursing -- Psychological aspects

Church decoration and ornament

Church architecture -- England

Church architecture -- Designs and plans

Architecture, Modern -- 20th century

Bluegrass music

Country music

Medical care -- Congresses

Geriatrics -- Congresses

Health promotion -- United States -- CongressesHealth promotion

for older persons - group program models

-Health promotion for older persons - group program models

Notes: Includes bibliographies

**Healthy Aging: Promoting Well**

These conversations were private and not held in the presence of the other residents waiting to be seen by the paramedics or the researcher.

### Health promotion

Following her retirement as an active professor, she devotes her time as an adviser for health research both nationally and internationally and shares her knowledge and experiences to further improve the nursing profession.

### Older Adults

These variables can be modified through nursing actions. In an effort to identify psychosocial and behavioral factors that may influence the trajectory of functional limitations, disability, and quality of life in persons with chronic disabling conditions, a number of investigators have begun to develop and test innovative interventions to promote the health rather than control the disease of persons with chronic disabling conditions.

### Aging and Disability Evidence

Using SOC in this way allowed us to see whether the interventions increased levels of participation in health behaviors among participants who had not achieved action or maintenance for a given behavior at baseline. We estimated saturated models including main effects for group, time, and SOC, along with all 2-way and 3-way interactions. The interventions selected for an ADEPP review have already been tested through randomized-controlled trials RCTs or quasi-experimental studies, and the results published in peer-reviewed journals.

### Nutrition and Health Promotion in Older Adults

Older adults can modify their diets if they are given appropriate explanation and instruction, but the changes must be perceived as relevant to their life or necessary to improve their health without imposing major stress. Predictors of cognitive decline and mortality of aged people over a 10-year period. Rockwood K, Song X, MacKnight C, Bergman H, Hogan DB, McDowell I, et al.

## **Healthy Aging: Promoting Well**

Fortunately, efforts are underway to identify strategies to combat social isolation and loneliness, and the worrisome health effects that come along with them 1;3;10.
