## **Trojan Nuclear Power Plant**

Navy since the beginning of the laboratory.

## **Russia to Decommission World's Most Remote Nuclear Power Plant**

Japan was already playing a leading role in the Generation IV initiative, with focus on sodium-cooled FBRs, though the 280 MWe gross Monju prototype FBR remained shut down until May 2010, and then shut down again a few months later, with prospective restart repeatedly postponed. Towards 2050 it proposes moving to a low-carbon scenario. Nuclear CHP is therefore likely to remain the preserve of countries like Russia and is unlikely to find widespread application for the foreseeable future.

## **Seabrook Station Nuclear Power Plant**

NPPs must be designed, manufactured and constructed to standards that ensure that the risks associated with their operation are mitigated and the benefits to society are achieved. Most of this capacity will be nuclear.

## **Seabrook Station Nuclear Power Plant**

If the social, health and environmental costs of fossil fuels are also taken into account, the competitiveness of nuclear power is improved.
