## Publikációs jegyzék

Monobenzenoid and Phenolic Aralkyl Compounds, their Derivatives and Oxidation Products Depsides, Tannins, Lignans, Lignin and Humic Acid.

## Relazione Scientifica Aprile 2012

Three new PG electives in the area of dynamics and control, specifically related to spacecraft navigation, guidance and control were introduced. The innovative project is based on the development of highly efficient catalysts of a propylene polymerization carried out at the Boreskov Institute of Catalysis, and on the successful cooperation of Tomskneftekhim and the Boreskov Institute Catalysis on testing these catalysts in the industrial production of PP.
