## SOUL OF A RAILWAY PART 21

In 1923 it was converted to simple expansion. Turned around in 90 minutes.

### Bushveld Igneous Complex

It is approximately 2 billion years old and is divided into four different limbs: the northern, southern, eastern, and western limbs. Thanks to both of you for your fine contributions which follow this introduction.

### An overview of the geology of the Transvaal Sequence and Bushveld Complex, South Africa

No mixing with mine water is evident here.

## SOUL OF A RAILWAY PART 21

On longer sections where headway was a problem, the blocks were split with an intermediate colour-light signal. During the final stages of siliciclastic sedimentation, the upper quartzite beds of the Formation were probably reworked by shallow marine processes before carbonate precipitation commenced. The overlying Upper Vaal Reef is part of a Lowstand Systems Tract LST.
