John Bardeen was the first person to have been awarded two Nobel Prizes in the same field.

Edwin Hubble: Mariner of the Nebulae

A revealing portrait of a scientific genius at work, this book also offers an incisive narrative of the history of astronomy, and an evocation of what we see when gazing at the stars. Through years of observation, scientists had discovered that the planets move around the sun, not in perfect circles, but in slightly elongated, elliptical orbits.

The Iconography of Scientific Genius: Charles Darwin and His Contemporaries on JSTOR

Strength the movement that involves the hamstring group in a pattern similar to their use in function. In the 1960s, a small group of radical thinkers began to take that notion apart, placing new importance on the tiny experimental irregularities that scientists had long learned to ignore. .

Functional Path Training: October 2005

He went off the wall when people criticized him. Kids dying and people melting in front of your eyes.

Portraits of discovery : profiles in scientific genius : Greenstein, George, 1940

Percy Before it's too Late, a Report to the Nation from the National Commission on Mathematics and Science Teaching for the 21st Century a copy can be obtained from the John Glenn Institute, 4th floor of Stillman Hall. They will appreciate the same qualities in the present work: a wealth of information and scrupulous honesty.

Francis Crick: Hunter of Life's Secrets

The greatness of the discoveries is set off against the contrasting pettiness of the man.
