APPENDIX II: SELECTED BIBLIOGRAPHY

Most often, it is the AV or another veterinarian who has the necessary and sufficient expertise to determine which practices are most appropriate and consistent with current standards. New York, Columbia University Press. Pereira, Andy Purvis, Caroline Ross, Karen E.

Enrichment and Nonhuman Primates: "First, Do No

In fact, the very willingness to possess physical objects without actually using them for a long time can be found only in human beings.

Cognitive and behavioral deficits in nonhuman primates associated with very early embryonic binge exposures to ethanol

Scientists working within any one of these areas might use very different methods, because there is no one discipline of animal cognition.

Primate Adaptation and Evolution

As far as cultural elaborations are concerned, we should primarily speak about rituality and the concept of privacy. With a breadth of material on cognition and culture from the lab and the field, *The Mind of the Chimpanzee* is a first-rate synthesis of contemporary studies of these fascinating mammals that will appeal to all those interested in animal minds and what we can learn from them.

Enrichment and Nonhuman Primates: "First, Do No

There are certain patterns of human group behavior and group formation that are only cognitive elaborations of the primate case. Different species are being studied in the field and in the lab, and the results of these studies may be relevant to areas of philosophy including action theory, agency, belief, concepts, consciousness, culture, epistemology, ethics, folk psychology, imagery, language, memory, mental causation, mental content, modularity of mind, perception, personal identity, practical reason, rationality, and so forth.
