Prepare For Emergencies

Improper use of portable generators or heating devices can release deadly carbon monoxide to indoor air. This report is based on data available as of December 31, 2019.

National Preparedness

Important Numbers For emergencies, call 911. These short tutorials highlight various functions on the ASPR TRACIE site.

ASPR TRACIE

These documents provide guidance and information on preparing for disasters or emergencies such as hurricane or flood, and for responding to emergencies once they have occurred. Learn how you can help minimize the health, safety, and environmental risks associated with handling and disposing of air-conditioning and refrigeration appliances under the extraordinary circumstances following natural disasters.

Prepare For Emergencies

Owners or operators of damaged facilities may be responsible for reporting spills. If you have a home-based or small business and your septic system has received chemicals, take extra precautions to prevent contact with water or inhaling fumes.
