Conservatives mock Gore on snowfall

All 19 climate scientists who had seen the movie or had read the said that Gore accurately conveyed the science, with few errors. Inspired, David assembled a team, including producer Lawrence Bender and former president of , who met with Gore about the possibility of making the slide show into a movie.

Climate Cover

He also defended himself against attacks by critics who accuse him of pushing the green agenda so that he can personally benefit from investments he has made in green technology. Climate changes when something causes it to change. Living species are dying at an unprecedented rate.

Gore's Call to Action

Remember you are commenting not to convince some hard core denialist, but for the benefit of more open minded people reading. Pedant that he is, he teaches his audience something. The Clinton Administration never submitted the protocol to the Senate for ratification.

Al Gore wins Nobel Prize in the wake of Inconvenient

In 1993 Gore helped the Clinton administration secure congressional passage of the. Bush, Exxon, and Chevron — all have supported taking action on climate change. I believe the key point is that Gore didn't make such a claim.

Gore's climate film has scientific errors

Nineteen of the hottest years ever measured have been in the last 20 years.

An Inconvenient Truth on iTunes

If Greenland and Antarctica continue to melt, Gore says the maps of the world will need to be redrawn.
