Impact evaluation

Downloaded September 20, 2006 from: Patton, M.

Affordable housing proposed on Quentin Road in Palatine

Region With World Bank public sector reform lending Without World Bank public sector reform lending Percent Number Percent Number Sub-Saharan Africa 70 30 47 15 East Asia and the Pacific 70 10 56 9 Europe and Central Asia 90 20 86 7 Latin America and the Caribbean 75 20 25 8 Middle East and North Africa 57 7 0 2 South Asia 50 6 0 1 Total 73 93 48 42 Source: IEG Note: Entries show the percent and number of countries with an improvement in the average CPIA during 1999—2006 Service delivery is a key aspect of good governance.

Evaluation: What is it and why do it?

The chapters on creating and implementing a monitoring plan, and on using the information obtained to modify the project are particularly useful. CBA too has the potential for expanding such connectivity. Overall, borrowers had a 73 percent improvement rate in terms of countries that improved the CPIA and non-borrowers a 48 percent improvement rate in this estimated governance score.

Evaluation, Economics, and Sustainable Development

The development community has tried to move from a focus on inputs and outputs to a consideration of outcomes and impacts, as has been seen in a series of events including the 2002 International Conference on Financing for Development in Monterrey, Mexico, which established the MDGs, and the 2008 Forum on Aid Effectiveness in Accra, Ghana. Rather than starting from scratch, looking at what others have done can help you conduct a better evaluation.

Evaluation: What is it and why do it?

Input should be sought from all of those involved and affected by the evaluation such as students, parents, teachers, program staff, or community

members. Evaluating sustainable development can have important payoffs in two ways. The following resource provides more depth on integrating evaluation into program planning: Beginner Intermediate Recreational Boating and Fishing Foundation.

Evaluation: What is it and why do it?

It discusses the importance of developing organizational capacity for evaluation, linking evaluation to organizational planning and performance reviews, and unexpected benefits of evaluation to organizational culture. Explicating the connection between evaluation and economic policy analysis is another overall objective of this book. For example, deciding to scale up when the programme is actually ineffective or effective only in certain limited situations, or deciding to exit when a programme could be made to work if limiting factors were addressed.
