## World Energy Needs and Nuclear Power

The average power was 923. Oil demand growth slows because demand for diesel and gasoline nears a plateau as new efficiency standards are applied to internal combustion engine vehicles and electric vehicles hit the market.

## Energy, Sustainability and Society

Accordingly, transport will become even more relevant.

## 2021 Oil and Gas Industry Outlook

We will likely shut down drilling next month, pay an early termination penalty to our rig contractor, and liquidate excess hedges to pay down debt. When burned they produce CO<sub>2</sub> and are the largest driver of global climate change.

## Renewables

This report includes a global issues map, 58 country maps, and six regional maps, as well as perspectives from Future Energy Leaders FEL and energy innovators.
