You have to be very alert to dive into that kind of book. I am sorry for blabbering on like this, but I just wanted to express my happiness to have found your blog, where it seems you stay away from preconceptions and shallow renderings of subjects that so much needs proper space and explanation which I feel you provide. The major arcana becomes a map of life, and the hero's journey becomes something that each individual can relate to the symbolism of the cards and therefore to the personal life. There's also some concerning statements such as the suggestion that schizophrenia is something triggered by one's life journey and can be fixed with therapy and further self growth I don't think I have to explain what the science says with this one.
