Time, Being, and Becoming

In either case, however, it is possible for time to exist prior to the Big Bang, so that time is not essentially physical time. Thus the Moving Spotlight Theory is an example of an eternalist A-theory that subscribes to the dynamic thesis.

Change, Cause and Contradiction

Temporal Language and Temporal Reality.

Tense & Emotions

Kw: Truth; meaning: time; reality There are two extant versions of the new tenseless theory of time: the date version and the token-reflexive version.

Bigelow, Possible Worlds and the Passage of Time on JSTOR

B-theorists think all change can be described in before-after terms.

Tense & Emotions

. The A-Theorist avoids the problem by holding that the only properties an entity has are those it presently has, so that e does not have incompatible properties. Mind has long been the leading journal in philosophy.

Bigelow, Possible Worlds and the Passage of Time on JSTOR

Tensed propositions can fully and accurately describe the world, but nevertheless change truth value over time. Tensed sentences may have

tenseless counterparts having the same meaning.

time

But on an A-Theory of time the beginning of the universe is the point at which the universe literally came into being. What this implies for Christ's crucifixion and resurrection is especially disturbing. The two kinds of temporal positions each represent events in time as standing in a certain order which McTaggart chooses to call the A-series and the B-series.
