

# On the etiology and pathogenesis of parturient paresis in dairy cows - statistical and morphological investigations and a review of the literature

Almqvist & Wiksells - Pathological evaluation of thigh muscle, sciatic nerve, and spinal cord in downer cow syndrome with emphasis on the prognostic significance

Description: -

-

Dairy cattle.

Milk fever in animals. On the etiology and pathogenesis of parturient paresis in dairy cows - statistical and morphological investigations and a review of the literature

-

Acta agriculturæ Scandinavica -- 8.

Acta agriculturæ Scandinavica. Supplementum -- 8. On the etiology and pathogenesis of parturient paresis in dairy cows - statistical and morphological investigations and a review of the literature

Notes: Bibliography: p. 74-78.

This edition was published in 1960
