Earth's Tilt Is the Reason for the Seasons!

It also cannily offered a look at Disney products, from rerunning old cartoons to background documentaries atop tall mountains, introduced, for its first decade and a half by Uncle Walt himself. It's because the spin of the Earth is actually wonky.

Seasons Aren't the Same Everywhere

Furthermore, a large amount of the Sun's energy is scattered before reaching the ground because the energy has to travel through more of the atmosphere.

The Four Seasons

Earth's tilted axis causes the seasons. Astronomists and meteorologists define seasons differently. As the ball moves around the lightbulb, the half closest to the light will be lit, while the other half will be in darkness.

Changing seasons

Solstices and equinoxes Every season has a middle point.
