History of the Rangers Club in Yosemite National Park

Carl Sharsmith Carl was seasonal Ranger Naturalist for many years in the Yosemite National Park. They were sent, by horseback, to Yosemite and Sequoia National Parks in 1899, 1903, and 1904 to protect the parks and enforce park rules. A fire detection and suppression system was added to the building.

Ranger Programs in Yosemite Park

This is a most important item in our programs. But on the western side of the park, roughly 2,000 feet in elevation below the towering El Capitan of Yosemite Valley, lies El Portal, home to park administration buildings, and a plethora of plants well suited to a dry, and hot life. The carved portion of the chevron and the ceiling boards have a light-colored stain finish, which contrasts with the dark beams, joists, and wall paneling, and emphasizes the zig-zag of the chevron and the strong lines of the ceiling joists.

Ranger Confidential: Secrets of the National Park Rangers

On the first morning of our honeymoon, we found grizzly tracks in the mud outside of our tent. Frank made several extensive field trips into the high country of the Park. It also serves as a natural floodwater reservoir and filtration system

Yosemite Ranger Notes

The Park Superintendent's Residence was built a little apart from the other houses in 1912 by the Army. He eventually got a job working concessions in Yellowstone National Park, where he was hired as a park ranger in 1987.

Yosemite Ranger Notes

A few other structures determined to warrant preservation for their cultural values may also be included. These ranger-therapists conduct critical

incident stress debriefings CISDs and often function as NPS liaisons or counselors for families.

Ranger's Club National Historic Landmark

During my time as a ranger, I have found that most people are here to see one elusive animal in particular: a bear! Likewise we understand that earthquakes and the freezing and thawing of ice on cliffs can also trigger rockfall. The Superintendent's Residence was extensively remodeled in the 1920s to National Park Service rustic standards. The musical presentations bring to life the forgotten history of the black American soldiers who essentially became America's first national park rangers.
