Wolverton and District Archaeological and Historical Society

Observations on dental variation in *Microtus* from the Cudahy ash pit fauna, Meade County, Kansas and implications for Irvingtonian microtine rodent biochronology. The society runs a series of Summer Outings to places of historic and archaeological interest between April and September every year. Further excavation reports are pending.

Assumptions and Protocol of the Taxonomic Identification of Faunal Remains in Zooarchaeology: a North American Perspective

At Tijeras Pueblo, a problem analogous to that of site type can be observed when fauna are considered by spatial context.

Buckinghamshire Archives

Introduction and Adoption of Animals from Europe In: Ubalaker, D ed.

Wavendon (The Gatehouse Record)

The Society carries out research into the history of Wolverton and the surrounding areas and holds meetings on a variety of historical subjects. A diachronic analysis of prehistoric animal exploitation at Ventana cave.

Wolverton and District Archaeological Society

While some of these differences likely reflect differences in analytical approach particularly recording to lower levels of taxonomic resolution, the taxonomic differences raise the possibility that some of the collection has been lost. Landscape, Lordship and Local Politics in the South-Eastern Midlands, 1066-1100 Oxford: John and Erica Hedges Ltd: BAR British Series 385 p. We can say, however, that middens and roomblocks were used — and fauna deposited within them — in different ways.

Wollaston Beacon Hill (The Gatehouse Record)

Hello, By chance I entered your most interesting site. Los siguientes sustantivos y adjetivos son palabras llanas o e la tilde sobre las Size: 7MB. The similar numbers of taxa reported — and overall similarities of the assemblages — at first glance seem to support this interpretation Table.
