Mathematics Education and the Legacy of Zoltan Paul Dienes

At age seventeen he moved to the United Kingdom to live with his father. He created tools for several other mathematical areas as well from geometry to set theory. Dienes' notion of embodied knowledge presaged other cognitive scientists who eventually came to recognize the importance of embodied knowledge and situated cognition - where knowledge and abilities are organized around experience as much as they are organized around abstractions.

Mathematics education and the legacy of Zoltan Paul Dienes (2008 edition)

Dienes was an early pioneer in what was later to be called sociocultural perspectives and democratization of learning. The place is an upcoming city in New-Guinea.
