Project

I soon realized that I had to find a way for every one of my students to feel that level of accomplishment. Learn how to implement it in your classes! If a student has mastered a particular objective, it is a waste of time for teachers to continue teaching that objective to that student.

Teaching for Tomorrow: physical education

Rather than one day, they would engage in collaboration like professionals in the workforce. They were also required to create, through their own participation and physical activity, data that proved physical exercise was occurring. History of Learning Progressions Like most big ideas in education, learning progressions are not new.

Onsite Professional Development Workshops from Physical Education Central

Instead of a project that is a curriculum add-on or completed at the end, the standards-based instruction is filtered through this authentic task, which creates a need to know in students. In addition to the group work, each student was required to create another engaging PE unit for middle school students, but showcase it in a format of each student's choice for example, podcasts, videos, flyers, or demonstrations. After the Human Anatomy Laboratory, we traveled to the Exercise Physiology Laboratory to learn about three physiology tests: the maximal oxygen uptake VO2Max test, the maximal anaerobic power Wingate test, and a body composition test.

Teaching for Tomorrow: physical education

Instruct students to screenshot their choice and type in their corrections. In my visits to classrooms across the country, I have seen some great projects that teachers have created and implemented.

How Personalized Learning is Breaking the “GYM” Class Stereotype

Grade Levels: K-12 PE and Health Willing to present locally and in the USA.

How Personalized Learning is Breaking the “GYM” Class Stereotype

Now that I am in my fourth year of personalized fitness planning, students have come back to share their successes.
