Humanity has spread to the stars. It is hard for me to even pinpoint why or how his writing resonates so very clearly with me.

It se A strange short novel - a novella, really 174 pp.

**To Die in Italbar**

This hazard and opportunity is the central problem. My biggest problem I enjoyed this book. The ambiguous premise of a man who is a healing saint and a dangerous sort of leper,should have made for an exciting concept for a novel,but unfortunately it's vagueness,poor plotting and dearth of fully realized characters and scenario,rendered it a washyspiritless voyage into literary nothingness.

Zelazney always writes something interesting and writes it well, but To Die in Italbar seemed a little sketchy to me.

In: The Collected Stories of Roger Zelazny, Volume 3: This Mortal Mountain, NESFA Press, 2009. I do understand it's supposed to be one of his weaker novels, and in all fairness, it's actually alright, there just didn't seem to be much point to it. It necessitates a bit of a closer read, but can be very frustrating when it's not clear for a page or two which character we're reading about.
