Best Handheld GPS

Photo: Jared Vilhauer We found that the highest performing — but unfortunately, also often the most expensive — models tend to achieve the best satellite reception. The Montana 680 is by far the largest and heaviest unit in our review but still weighs only 10 ounces. Most people experience a pack's full of frustration in trying to learn these complicated devices.

This is especially helpful for outdoor guides or scientific surveys. But for many of these units, you can also boost your unit's memory with a microSD card; only the inReach Explorer+ and eTrex 10 don't support extra external memory. Before buying your next GPS, consider if you need one, what you intend to use it for, and how much you're willing to spend.

In contrast, you have to be moving for a differential compass to work properly. Although the Montana 680 and inReach Explorer+ were nearly as speedy as the 66st, even basic units like the eTrex 10 impressed us with how quickly they were able to lock onto a signal after powering on.
