Reeling the string back up, he measured it carefully with the ruler, making adjustments for its elasticity under the weight of the stop watch, and calculated the height of the building within two inches. Now, the room contains a table and three metal spheres about the size of softballs. See for advice on how to apply categorization to articles relating to people.

It now includes all the recent developments in C++. Next the engineering major, still panting from running up all the stairs to the roof, took his turn. It allows physics professors to prepare students for a wide range of employment in science and engineering and makes an excellent reference for scientists and engineers in industry.
