European Center of Military History

The engineers' role in amphibious warfare was not considered until shortly before the attack on Pearl Harbor in December of 1941. If the 99th Infantry Division and 291st Engineer Combat Battalion had not held on the northern shoulder, the 7th Armored Division never would have reached St. Bastogne did not become surrounded by forces intent on taking it until the night of December 21, Day 6 of the Battle of the Bulge.

7th Marine Regiment

The dense forest had very few roads, none of which were large. Also in direct support is Delta Company 3rd AA Battalion who returned to 3rd Assault Amphibian Battalion. Some of the GI's had wondered why they saw German planes before that, despite the conditions, but saw no American planes.
