## Seamless, breakthrough care: Building a new healthcare vision in the East Metro and beyond

Improve patient care and outcomes A patient walks into the emergency department ED complaining of chest pains. Aetna's customers include employer groups, individuals, college students, part-time and hourly workers, health plans, health care providers, governmental units, government-sponsored plans, labor groups and expatriates.

## Collaboration between doctors and pharmacists in the community

The space should allow for an intimate discussion where the patient does not feel rushed or concerned about privacy. Taking medicines will always involve some risks. The same pilots are being repeated in different localities rather than moving on to the next level, and people are unsure how to implement roles.

## Factors affecting collaboration between general practitioners and community pharmacists: a qualitative study

As a result of the wide variance between states regarding the nature of services allowed, the nature of the protocol, and the disease states covered, each setting needs to refer to the specific rules in the state in which the pharmacist will practice to determine the extent to which clinical pharmacy services can be provided under protocol.

## Tweed Valley Hospital Development

Participants were recruited until each theorized category professional group, previous experience and region independently achieved saturation of thematic findings. Nor is it difficult to recognise how important it is for patient care.

## Bridges Health Partners and Aetna extend value

Other institutions and organizations are utilizing pharmacists to complete medication therapy management MTM, while some are utilizing decentralized pharmacy technicians on floors to provide real-time adjudication of prescriptions. NC Program on Health Literacy. This meant that

any problem we had could be solved straight away.
