

# Selected papers on remote sensing of environment

American Society of Photogrammetry - JPL Science: Home

Description: -

-Selected papers on remote sensing of environment

-Selected papers on remote sensing of environment

Notes: Includes abstracts and selected papers from the proceedings of the first, second and third Symposia on Remote sensing of Environment.

This edition was published in 1966

Filesize: 68.46 MB

Tags: #Time #Series #Analysis #with #High #Spatial #Resolution #Imagery

## IEEE GRSS Awards for 2014

His research activities are in the area of machine learning, pattern recognition, remote sensing and Earth observation. The spectral signatures of photosynthetically and non-photosynthetically active vegetation showed obvious difference and could be utilized to estimate forage quantity and quality of grass prairie. They were then weighted according to a percentage of influence and combined to produce a map displaying suitable locations for the proposed flood shelter.

## IEEE IGARSS 2020

A classification system for different land cover types with a special emphasis on the sparse vegetation cover was developed to resolve problems related to the seasonal changes and the highly variable natural conditions. Geochemical evidence for possible natural migration of Marcellus formation brine to shallow aquifers in Pennsylvania.

## Selected Publications

He has also been involved in electromagnetic modeling of electrically large aperture systems and structures.

## Time Series Analysis with High Spatial Resolution Imagery

NASA's Hyperspectral Thermal Emission Spectrometer HyTES.

## Qihao Weng

D degree in electrical engineering of Hunan University, Chansha, China. For example, Landsat ETM+ imagery has a spatial resolution of 30 m for the multispectral bands and 60 m for the thermal infrared band. More than three million homes were destroyed and 160 persons lost their lives in the great flood of 1973.
