## The Long

Inclusion on this list is for information purposes and does not constitute an endorsement by Child Welfare Information Gateway or the Children's Bureau. American Journal of Orthopsychiatry 61 2 :195-209.

## 7 INTERVENTIONS AND TREATMENT

Women with such abuse also had significantly greater lifetime prevalences of agoraphobia, obsessive-compulsive disorder, social phobia, sexual disorders, PTSD, and suicide attempts than women without such abuse. Despite the large literature on the detrimental effects of child maltreatment that Chapter 6 outlines, the majority of treatment programs do not provide services directed at the psychosocial problems of the abused child.
