### **Code of Conduct**

Computing professionals should perform due diligence to ensure the system functions as intended, and take appropriate action to secure resources against accidental and intentional misuse, modification, and denial of service. Please wear appropriate clothing free of swear words, crude statements and references to illegal substances.

### **Microsoft Community Code of Conduct**

The document covers rules on how to use company assets, how to handle business information, conflict of interest and relationships with external partners. The entire computing profession benefits when the ethical decision-making process is accountable to and transparent to all stakeholders.
