Application of Educational Psychology in Teaching and Learning

Also read Psychology with stories and Analysis : The Goob Says: I like it how this was broken into different criteria so we can see the breakdown of the aspects of learning.

Introduction to Educational Psychology Theory

When first grade teachers use practices that demonstrate caring toward students and practices that foster interpersonal skills among students, students are less likely to reject one another Donahue et al, 2003.

Relationship Between Education and Psychology

Likewise, CDP appears to have some long-lasting effects; students enrolled in the CDP elementary schools were less antisocial and more prosocial in middle school as well Battistich et al.

Educational Psychology: Classroom Connections by Eggen, Paul, Kauchak, Don: Good (1992)

Hence, there is no doubt that a knowledge of psychology is quite essential for planning and organizing any educative effort. As students gain experience as students, they become able to think about how they themselves learn best, and you as the teacher can encourage such self-reflection as one of your goals for their learning. The traditional education was subject centered and teacher dominated.

Introduction to Educational Psychology Theory

Journal of School Health, 74 7 , 262-273. There are many solidified learning theories that teachers can learn from as they prepare to help students in the classroom

Be

Forming positive relationships with behaviorally difficult students These video clips show two teachers talking about the ways positive relationships

with their students helps to reach and motivate them. This video clip is of a teacher talking about the complementary role that her relationship with the child and the family plays in managing a child's behavior in the classroom. The results of the evaluation might guide the development of future lessons and activities.

How Are Teachers Using Psychology In The Classroom?

Development psychology looks at the psychological, emotional and intellectual characteristics of individuals according to their age and stage of life.
