parents, they do not receive the same heredities an exception is identical. It was questioned by German biologist , whose famous experiments in the late 1890s on the amputation of tails in generations of mice showed that such modification resulted neither in disappearance nor even in shortening of the tails of the descendants.

### **Hampton L. Carson (1914)**

While the evolutionary purpose of this behavior is not clear, the fact that animals routinely exhibit same-sex behavior belies the notion that gay sex is a modern human innovation.
