[PDF] Psychobiography and the Psychology of Science: Encounters With Psychology, Philosophy, and Statistics

Many other procedures, however, lent themselves more to configurational or narrative interpretation: for example, a group conference with the person being studied, informal conversations, an autobiography, the Thematic Apperception Test TAT , and a Dramatic Productions Test developed by Erik Erikson; see Homburger, 1937. Reassessing the History of Ambivalence Toward the Study of Individual Lives It is difficult to understand the history of ambivalence toward the study of individual lives in personality psychology if we accept historical accounts that attribute the origins of the field to clinically-derived theories, on the one hand e. He became very active in research on encounter groups and educational theory.

Applying assessment strategies in psychology: Choosing assessment methods

Such supplements should be uploaded using the supplemental files tag in Scholar One. The desire to attain self-actualization results in the B-values acting like needs.

The 4 Major Personality Perspectives and Theories

Thematic Apperception Test The Thematic Apperception Test TAT consists of 30 cards including one blank card depicting ambiguous drawings.

Chapter 12: Personality Assessment

Many of them play cards, go to movies, smoke, dance, drink, and engage in other activities, some unmentionable. In general, however, abnormal psychology was considered to be a medical subfield rather than an area of psychology, and the profession of clinical psychology was still in its infancy Napoli, 1981. As that approach developed, so did a unique theory of personality that aimed at explaining the effectiveness of the therapy.

SUMMATIVE PERFORMANCE ASSESSMENT Overall Mixed potential. Value empirical evidence, tolerate ambiguity, act ethically and reflect other values that are the underpinnings of psychology as a science. Both the body and the mind are transient, but the Self continues.

Chapter 12: Personality Assessment

Significant samples: The psychological study of eminent individuals.
