Release of Trichogramma minutum against borers on jasmin Before applying any treatment the average of borers count per jasmin tree was 50, in 39 trees of jasmine borers count estimate was 1950. Inclusion of a pesticide product does not indicate a recommendation or endorsement by RHS Gardening Advice.

Biological Pest Control: The Glasshouse Experience

As part of the campaign against it, from 2003 American scientists and the Chinese Academy of Forestry searched for its natural enemies in the wild, leading to the discovery of several parasitoid wasps, namely Tetrastichus planipennisi, a gregarious larval endoparasitoid, , a solitary, parthenogenic egg parasitoid, and , a gregarious larval ectoparasitoid.

Controlling pests

In some cases floral resources are outright necessary. This program also led to the development of many concepts, principles, and procedures for

the implementation of biological control programs.

The Tremendous Work 'Sharh Usool I'tiqaad Ahlis

Littlehampton, Sussex: Glasshouse Crops Research Institute. The production at this nursery has reached an astonishing one million predators a month minimum to a high of two million. Bu çalışmanın esas amacı *Trichogramma minutum*'u laboratuar koşullarında *Sitotroga cerealella*'nın yumurtaları üzerinde yetiştirmek, daha sonra elde edilmiş yumurtaları kartonlarda toplamak ve BUIITEMS kampüsünde civarında bulunan yaprak bitleri, pireler, keseci kurtlar ve tripsler gibi zararlı böceklerle karşı biyolojik mücadele etmeni olarak uygulanmaktadır.

Biological Control

Other natural enemies are being evaluated for control of aphid pests of foliage plants. Taxonomic studies on fruitflies of the genus *Urophora* Diptera: Tephritidae.
