## The Language of Stone: March 2019

Your field training culminates in a four week independent mapping project in a location chosen from areas such as the Isle of Skye, the Peak District, the Cornish coast, the Pyrenees, the West Coast of Ireland, and Greece.

### Items where NERC Author is

Between these regions lie bands of sandstones and limestones of different geologic periods, many of them relicts of primeval times when large parts of central and southern England were submerged below warm seas.

### Geology BSc

The quality of the data is variable and REE and several critical trace elements are available only for a small number of samples Hoal, 1990, Becker et al.

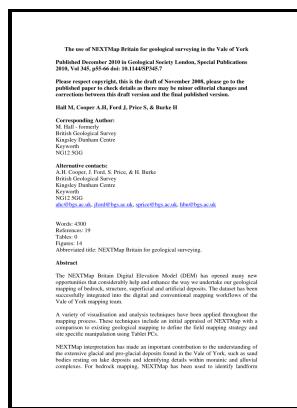

### Record details

C—D Repetition of this cycle of volcanism, burial, and intrusion at ca. It is composed of various ortho- and paragneisses, whose geographical distribution, age and tectonic setting are inadequately documented in Namibia.

### Images of early maps on the web: 12b. British Isles

Plus a second fieldtrip at the Energy Recycling and Recovery Centre in Leeds. View ii looks perpendicular to the foliation and lineation 6 in.

### Items where NERC Author is

Filesize: 21.1010 MB

The age distributions match with analogous rocks of the central Dom Feliciano Belt and the Kaoko Belt, and show similarities with the Gariep Belt, suggesting deposition in a system of coeval and spatially related paleobasins around the time of Rodinia breakup. A Histogram and relative probability of zircon ages from meta-tonalite and felsic schist samples of the Isua region, from
