## **problems growing Potatoes (plants forum at permies)**

To reduce clods, avoid cultivating when the soil is wet. If they are planted outside with a large cage, you will need to secure the cage to a sturdy stake, or two, to keep it from falling over.

## **Garden Guides**

Soap solutions must come into direct contact with insects in order to be effective. Seattle's , which opened more than a century ago, has been joined by a network of weekly neighborhood farmers markets around the city, and similar markets operate in other Puget Sound cities, Spokane, and elsewhere.

## **About Growing Great Potatoes**

The details of planting for the home gardener are not substantially different than for other states, but planting dates may vary, and some areas of the state are better suited for growing potatoes than others. Since pesticide registrations change frequently, affecting the availability of pesticides and changing permissible practices, this publication does not make specific pesticide recommendations. By early May, some growers were making the painful decision to plow under fields they had just recently planted, rather than continuing to spend the thousands of dollars per acre necessary to raise crops with nowhere in sight to sell them.

## **Potato Farming in Washington**

The temperature should be just below normal room temperatures 55 to 60 °F. Table 1: Fertilizer application rates Fertilizer per 100-ft row per 1000 sq ft 10-10-10 7 lb 23 lb 15-15-15 4. Seed-borne diseases: The most serious diseases of potatoes are carried in the seed tubers.

## **About Growing Great Potatoes**

Grow at least two or three to ensure that you get male and female blossoms open at the same time. As the senior manager of raw procurement for

Idahoan Foods, Andrus works closely with contract growers to make sure there are always potatoes to process.
