## Designing in between Local Government and the Public

Thus, this analysis appreciates that the materiality and positioning of actions in urban spaces are causes of political action. Design ethnography in information systems.

## Big data analysis of local government 3.0: Focusing on Gyeongsangbuk

Journal of Planning Education and Research, vol. Thus, they are useful for discerning observed or reported patterns of interaction among various actors and ICTs within a specific context to speculate about potential interventions that provide a benefit, such as a faster process, greater satisfaction by the various participants and, lastly, voluntary participation. Renewable and Sustainable Energy Reviews, 108, 194—208.

## Back Matter on JSTOR

The role of participants in digital civic infrastructures The assertions of user empowerment found in the literature on participatory design is complementary with the approach described but, in addition, this institutional methodology emphasises the political context of the various social interactions involving civic infrastructure. Convergence may be motivated by a variety of factors, as well as community-based conservation projects.

## Big data analysis of local government 3.0: Focusing on Gyeongsangbuk

In local government, pervasive critique is directed at the fact that most government-organised participation remains constrained by rules set by government Boonstra and Boelens. During the initial research and requirements stages, the levelling of action situations as recurring participatory patterns as well as their influence over outcomes e.
