## **Cyclophosphamide compared to ifosfamide for the treatment of sarcoma in children and young adults**

Treatment with alternating cycles of non-cross-resistant chemotherapy has been used in a number of diseases with good results. The faster the cells are dividing, the more likely it is that chemotherapy will kill the cells, causing the tumor to shrink. Durkee C, Bensom R 1980 Bladder cancer following administration of cyclophosphamide.

## **Bone Cancer Treatment Regimens**

READ ACCOMPANYING PACKAGE INSERT for detailed indications, dosage, and precautions.

## **Ifosfamide versus cyclophosphamide in combination drug therapy for metastatic breast cancer**

McNall-Knapp RY, Williams CN, Reeves EN, et al. Comparison of MAPIE versus MAP in patients with a poor response to preoperative chemotherapy for newly diagnosed high-grade osteosarcoma EUARMOS-1 : an open-label, international, randomized controlled trial. Therefore 199 patients were eligible for safety and efficacy assessment 101 in the CIP arm and 98 in the CEP arm.

## **Cyclophosphamide versus ifosfamide: final report of a randomized phase II trial in adult soft tissue sarcomas**

Subbiah V, Rohren E, Huh W, Kappadath C, Anderson PM. The response rates, durations of remission, and survival were similar in both groups.
