Towards Sustainable Household Consumption? Trends and policies in OECD countries

New infrastructure investments, including in low-carbon developments, need to build in resilience against future climate impacts, by assessing climate risks across the lifetime of the project. For passenger transport, stimulus packages should aim to combine support for a transition to less polluting cars with investments that initiate a shift towards accessibility-based mobility. Emergency measures by governments helped keep food supply functioning during the COVID-19 , but agricultural continue to pour out subsidies inefficiently without encouraging sustainable production, the said on Tuesday.

Towards sustainable household consumption? : trends and policies in OECD countries

For the full report, please go to the. The emphasis is not only on preventative measures to reduce cost of recover, but also on incorporating social and environmental improvements for increasing well-being of impacted societies. The similarities between COVID-19 and that crisis are however limited.

Towards Sustainable Household Consumption?: Trends and Policies in OECD 9789264197374

As the health crisis gradually abates in some countries, attention is now turning to preparing stimulus measures for triggering economic recovery. It contains an analysis of household consumption patterns in food, tourism-related travel, energy, water and waste generation. Investing for low-carbon, resilient electricity systems 18.

Food supply success in pandemic belies wasteful farm policies

Cities, and the building sector more broadly, are key targets for energy efficiency improvements.

Natural ecosystems are also essential pillars of resilience.

Household Consumption Trends and Policies in OECD Countries : Towards Sustainability by Organisation for Economic Co

Continued technological and process innovation will be critical to achieving climate and other sustainability goals. Despite widespread policy efforts to encourage greater recycling and circularity of both production and consumption, the rate of recycled materials globally remains low.

Towards Sustainable Household Consumption?: Trends and Policies in OECD 9789264197374

This report is also about what OECD governments are doing, or can do, to help households reduce these environmental impacts. While this electrification trend can have substantial benefits for reduced air pollution at the point of use, the implications for GHG emissions depend on the decarbonisation of the underlying electricity system, as well as its ability to handle the increased demand pattern. With massive stimulus packages starting to be unveiled around the world, governments, businesses and societies as a whole have both a responsibility and self-interest to not only look for near-term measures to shore-up livelihoods and employment, but also to take a step back and reflect on the political and economic driving forces leading to the current crisis.
