In addition, some excipients are used to aid

the identification of a drug product. The invention is not limited to the embodiments described above but may be varied within the scope of the claims.

## Principles and Practice of Homeopathy

Hence, the present invention is directed to specific homeopathic complexes which can treat anxiety and anxiety-related conditions without the negative side effect and costs issues usually associated with conventional pharmaceuticals. To make an anti-anxiety homeopathic composition of the invention, each ingredient is made according to the potency range described above and this is done by different methods depending on whether it is a tincture or titrate. Although, it will be understood that any homeopathic potency can be used provided that the dangers of toxicity with very low potencies or tinctures are taken into consideration and managed to remove any such danger from the final homeopathic preparation.
