How the US Army is Preparing to Fight Hybrid War in 2030

This and other novel concepts will help us become more nimble, less predictable, and better capable of rapidly shifting to combat operations, when needed.

Chief of US Army Futures Command: The service is experiencing a technological evolution

A 2018 Executive Order E. Successful implementation of the H2F system will take a total effort by the entire Army, more so from leaders at every echelon. The future of warfare is being shaped right now before our eyes, and the Army proudly stands at the forefront.

Chief of US Army Futures Command: The service is experiencing a technological evolution

It responds to the new fiscal environment and emphasizes new ways of operating and partnering. We all now should be able not just to access information online but also to evaluate and communicate it in new and better ways.

Bring US operational training and experimentation into the 21st century

These organizations have demonstrated that improved capabilities that address critical capability gaps can be fielded more rapidly. A proven way to reduce sustainment costs is by applying commercial best practices to defense acquisition and sustainment. S and the rest of the western hemisphere against any hostile European forces.

The Need to Inoculate Military Servicemembers Against Information Threats: The Case For Digital Literacy Training for the Force

Fifteen tons was the maximum weight that could be carried on Army pontoon bridges, the capabilities of which Engineer Branch was unwilling to commit research and development funds to increase. DOD has had some notable successes with PBL-based sustainment contracts. For example, in the ongoing that particularly plays out in s, with such online disinformation campaigns.

The United States Army

The Army is taking steps to defend key fixed sites and provide effective air and missile defense protection of maneuvering forces by modernizing short-range air defense and Terminal High Altitude Area Defense systems as well as developing onboard aerial and ground vehicle advanced protection systems.

Field Feeding in the 21st Century

Our strategy acknowledges the imperative of a global, networked and full-spectrum joint force. Army, Training and Doctrine Command, The U. In an attempt to push subsistence forward to soldiers, several initiatives resulted in converting 2½-ton cargo trucks into mobile kitchens.
