## Kool Houses, Kold Cities

Euralille improved its energy intensity and achieved a significant reduction of 38. The Euralille Masterplan was designed by Dutch-based firm Office of Metropolitan Architecture, now AMO in the late 1980s. Euralille, Koolhaas asserts, is scaled to be seen from a moving train or a speeding automobile.

### is urban catalyst theory legitimating 'power' in architecture?

No longer Lille receiving recycled structures from Paris, instead many star-chitects were appointed for different buildings.

## Tertiary City Lille

In 1985 Lille's Deputy Mayor, Pierre Mauroy Prime Minister of France from 1981 to 1984 started to pressure the French government to have the train station in the centre of the city. In Lille this phenomenon has resulted in new business clusters that are largely incongruent with the existing urban fabric, as cheap land and formal freedom trump the high-amenity yet spatially-limited old town. The design by Rem Koolhaas is architecture at its most electrifying and electrified brilliance.

## Lipsky+Rollet's mixed-use EKLA complex: an inhabited island in Euralille

These will be considered in this study as exemplars of the types of work spaces that are at the cutting edge of what is being built in Lille today. Architects Florence Lipsky and Pascal Rollet conceive of the EKLA development as a big inhabited island with a specific urban character, even though its unusual position makes it appear to be a crossroads between different worlds.
