## Boosting meat industry performance

There is complete traceability of the feedstuff and the chickens: we know which truck driver transported what delivery in what truck, including the route.

## Contaminated chicken: After illnesses

Filesize: 23.79 MB

### soar, Denmark attacks salmonella at its source

EuroDan Poultry Forum would therefore work closely with the Danish Poultry Council.

### Case story: Danish Poultry

For slaughtering in Denmark, the value is separately estimated for 7 groups of animals. Data on imports and exports of pigs and pork are compiled by means of extracts from Statistics Denmark's official external trade statistics, supplemented by information from duty funds in agriculture. The gauntlet begins with a walk into the entry area, where visitors strip off their clothes and shoes.

### PoultryWorld

From 2005 the number of slaughtered animals at the producers is fixed at 24,000 pigs annually corresponding to 1. This results in a total of 1. This week, commissioned by a Danish agriculture industry trade group lays out a strategy for how the country can reduce emissions while producing significantly more food.

### New Danish poultry forum

The total production of meat comprises meat from recognized slaughtering and the production of edible offal.
