The surveys also include household consumption, assets, self-reported health status and a battery of health measures including anthropometrics, hemoglobin, blood pressure, lung capacity and time to stand from a sitting position. The problem is that PPPs tend to involve complex contracts that are difficult and costly to prepare. Abstract Advocates of public-private partnerships PPPs for infrastructure services in developing countries have long battled criticism of these arrangements by civil society groups.

Agency for International Development and the United Nations Development Programme are broadly diversifying the sectors in which they will make future investments. Indeed, why would such projects be any more successful than smaller and simpler PPP projects in meeting expectations regarding costs, profits, finance, investment, equity, efficiency, and governance? Electricity generation PPPs can also be purely private operations, often structured as Independent Power Producer IPP projects involving ownership of the assets by the private sector rather than by government as in traditional concessions.
