### Speech disorder

Other speech sound disorders can be linked to things such as a cleft palate, problems with the teeth, hearing loss, or difficulty controlling the movements of the mouth. Your child's SLP should be licensed in your state and have experience working with kids and your child's specific disorder.

### Cleft Lip and Palate

American Journal of Speech-Language Pathology, 8, 81—93. This is a behavioural response wherein the child

Filesize: 66.510 MB

attempts to inhibit the nasal air emission by constricting the nose to reduce the air escape.

**9781133732365: Cleft Palate & Craniofacial Anomalies: Effects on Speech and Resonance (with Student Web Site Printed Access Card)**

Because of this, too much sound escapes through the nose.

### Speech disorders

When surgical repair is not , the palatal defect may be covered by a special prosthetic plate obturator similar to false dental appliances. During speech production, VPD can cause hypernasality a resonance disorder , nasal air emission, or both. Because clefts cause obvious physical changes, they are easy to diagnose.
