Mathematics and Its History (豆瓣)

The Mo Jing described various aspects of many fields associated with physical science, and provided a small number of geometrical theorems as well. They are significant in that they contain the first instance of trigonometric relations based on the half-chord, as is the case in modern trigonometry, rather than the full chord, as was the case in Ptolemaic trigonometry.

What is Mathematics?

Algebra is the branch of in which abstract symbols, rather than numbers, are manipulated or operated with arithmetic. It is very stimulating and will be appreciated not only by students. His notation was similar to modern mathematical notation, and used metarules, , and.
