#### geochemical code phreeqc: Topics by Science.gov

To facilitate use of these reaction capabilities in scripting languages and other models, PHREEQC has been implemented in modules that easily interface with other software. However, for boundaries between solids and dissolved species a specific concentration needs to be stipulated, and the same applies if other components than those displayed in the diagram are involved in the possible reactions. Late- and post-Pan-African Plutonic Activity Abundant late and posttectonic plutons were intruded into the Arabian Shield between 680 and 550 Ma.
