Differing from earlier assembled one, the monolithic lens is a single piece of optic composed of large number capillaries cohered together.

### Ch'oe Han

The basic sciences include anatomy, biochemistry, physiology, microbiology, pharmacology, pathology, and behavioral sciences. More likely, alterations to the lumen of the appendix reflect a life of clinically silent inflammatory conditions see Chapter 15. At the same time, his philosophy of experience can be interpreted adequately in the context of not British empiricist but Confucian philosophical assumptions.
