How to Connect a DVD Recorder to a Television

I use the first method I described in this thread and use a Sony RM-2100 universal remote with macros to make the system easier to use. My VCR is connected to satellite receiver via 75ohm cable.

How to Make HDTV Audio and Video Connections

The the box runs off the main right and left channel only.... . Except for the fact that a home theater might use speaker cables, subwoofer cables, digital audio cables, S-video cables, analog audio cables, composite video cables, or even component video cables.

0672226480

The DVD player has an S video plug-in and 2 audio and 2 video plug-ins, and a coaxial plug-in. I have one and I love it when I remember to program it, of course. I really look forward to hearing your advice.

Digital

Digital cable is a different story.

Convert Family VHS Videos to DVD

They wound up starting La Isabela in what today is the Dominican Republic, but the settlement was short-lived. An HDMI cable handles both video and audio. Everything worked fine in the surround sound mode until I switched from cable to satellite.
