RSC Journals Home

Published twelve times a year, Public Health considers on any aspect of public health across age groups and settings.

Royal Society for Public Health

Whilst research focusing on the practical basis of public health delivery or providing a foundational understanding of theoretical issues in the field is the journal's core interest, robust and ethically sound articles on any public health topic are welcome. By the 1950s, the Society was a leading authority in its field, and was regularly consulted by governments and the international press on health-related issues.

Home

Since the 1970s, the Society has focused its activities on the most successful areas of its work - examinations, certification, and the journals and. The common theme is maintaining high standards of hygiene, public health and safety.

Easing the Disruption of COVID

The journal invites papers from across the broad public health subject area, with a particular focus on public health in practice, emerging topics, and policy debates. Public Health also publishes invited articles, reviews and supplements from leading experts on topical issues. Findings from the DELVE project will be posted on this site, with the aim of informing the development of strategic approaches to managing the covid-19 pandemic.

Isaac Newton

DELVE — Data Evaluation and Learning for Viral Epidemics — is a multi-disciplinary group, convened by the Royal Society, to support a data-driven approach to learning from the different approaches countries are taking to managing the covid-19 pandemic. It is incorporated by completely independent of and of any special interest.
