About Sociolinguistic Research

I have learned a lot of Finance theories at school, and now it is time for me to put them into practice. As you know there is an open position in my department, and I need to fill this position as soon as possible. Evidently, there are limits to the possibility of generalising from the result of a small interview study as this.

About Sociolinguistic Research

The corpus of data investigated for the project consists of eight sessions of pairs of conversants in carefully planned interviews followed by unplanned, surreptitiously recorded conversational encounters of the same pairs of speakers. Discharge planning from hospital to home.

Mike : Doing office work is good. What parts stay the same? AN, KT and GB performed the data analysis. In connection with surgery, this means that the discharge conversation, considered from the vantage point of the practicing nurse, denotes an opportunity to communicate essential information to the surgical patient before home-going.

Discourse Analysis—What Speakers Do in Conversation

Mike : John, nice meeting you. Quality and safety education for nurses. This is especially true in a research position, where making calls like that could be an abuse of power.

Language in Conflict — Conversation Analysis

John: No, I think I have a pretty good understanding of the job. Mike : Can you handle pressure? It may be the case that certain surgical wards

have established a more rigorous discharge process or even a formal discharge conversation. The possibility of prudent and efficient communication with the patient is crucial also with respect to the safety dimension of nursing practice.
